

BEAUTY & FUNCTION COMBINED

Orgonite

PROPRIETARY BASE MIXTURE

Here at African Goddess Creations, we believe in the power of Orgonite to shield you from the detrimental effects of electromagnetic radiation (EMR) and other erratic energies. With African Goddess Creations' Orgonite, you can reclaim your energetic well-being and create a harmonious space free from the disruptive influence of EMR and erratic energies.

Our Orgonite creations are crafted with a proprietary mix of ingredients that work synergistically to provide a harmonious and protective energy field.

Our Orgonite creations, with their unique blend of: Metal Shavings, Crystal Dust and Ormus Powder, create a powerful energy matrix that neutralizes the harmful effects of EMR and other erratic energies. When placed in your surroundings, they form a protective barrier, harmonizing the environment and promoting a sense of calm and balance.

Experience the transformative power of Orgonite, handcrafted with care and infused with the intention to protect and uplift.

Base Mixture - Overview:

Metal Shavings: The metal shavings used in our Orgonite include Aluminium, Brass and Copper. These metals possess unique properties that contribute to the effectiveness of the Orgonite matrix. Aluminium is known for its conductivity and ability to reflect energy, while Brass and Copper are revered for their grounding properties. Together, they form a powerful foundation for the Metal Matrix.

Crystal Dust Blend: To amplify the protective qualities of our Orgonite, we incorporate crystal dust into the mix. The crystal dust consists of carefully selected crystals renowned for their ability to neutralize and transmute negative energies, namely: Clear Quartz, Selenite, Lepidolite, Shungite & Black Tourmaline.

Ormus Powder: We also add Ormus powder to our Orgonite mix, further enhancing its protective properties. Ormus, often referred to as 'white gold' or 'the Philosopher's Stone,' is a substance that occurs naturally and is rich in vital minerals and platinum group elements. It helps to balance and harmonize the energy within the Orgonite, amplifying its protective capabilities.
